I love this soundtrack to death. It is pure gold. Every track in the game is here, except for the Halloween song for some reason. My favorite track on here is called "Ready to Roll", but every song on here is amazing. The music pumps you up, making fire fights so much cooler. This is the only soundtrack, and pretty much album that I love every song on it (the only exception is probably Green Day and Skillet.) All of these songs are very different from each other, and at no point does it feel like the same song is playing. I'm sure you're wondering why buy the DLC when you can get the songs from the files, but there's a real reason to get it. The DLC has every song have a beginning, middle, end and a second verse, with usually a really cool guitar solo before the second verse starts. Also you get a cool album art photo. If you don't own either this game or this soundtrack you have not lived life yet, so get both. Listen to the soundtrack. It's so good. Just get it. It's worth every penny.
